It is probably important for everyone to be aware that ADEQ is considering doing some air monitoring in the area to determine the concentrations. Laura Malone said they were looking at that possibility at the last state call. While it may not be our info to share externally, it would be unfortunate if Maricopa County called this fugitive and then ADEQ results subsequently showed it as significant. Maricopa may want to wait until ADEQ is finished before finalizing their decision if they have not done any independent sampling.

So it appears that Hickman is not party to the 2009 CAFO CD. Therefore, they should have done the one time reporting to the LEPC as a CAFO with continuous emissions. ADEQ is following up to see if they can find that written comms. If Hickman did not report, that can inform our options on next steps (if any). Dan
